

No School

Coronavirus can pass from one person to another.

It can pass more in big groups.

We have big groups at school and so I am staying at home.

I can help stop the spread of germs by staying at home and washing my hands with soap and water:

- Before I eat my food

- After I sneeze or blow my nose

- After I go to the toilet

I will stay at home and do work that is sent from school.

I will work hard and try to complete my work.

When it is safe, I can be in big groups and school will open again.
